NOTE.—The above figures show the loss or gain by migration. Minus sign (—) indicates loss by migration.

(a) Troop movements have been excluded for the period September, 1939, to June, 1947.

(b) Owing to the difficulty of separating troop movements, records of interstate movements have been excluded from July, 1943, to June, 1947. The figures in respect of this period refer to overseas migration only.

† NOTE.—The figures given for each port in the last two tables above do *not* take into account coastal movements of shipping. Ships are recorded as arrivals at the *first* Tasmanian port of call only, and as departures only at the last port of call in Tasmania. A vessel coming direct to Stanley from Melbourne, calling at Burnie, Ulverstone, Devonport, and Launceston, and leaving the latter port for Sydney, would be recorded only as an arrival at Stanley and a departure from Launceston. For total shipping (including coastwise) at each port see page 31.

(*a*) From 1939-40 to 1947-48 inclusive, the Commonwealth Government compulsorily acquired the apple and pear crops. Production figures quoted above for the years 1944-45 to 1947-48 represent the total assessed crops as measured by assessors of the Apple & Pear Marketing Board, and are not strictly comparable with pre-acquisition and post-acquisition years' figures, which relate to *marketed* crops.

(*a*) Average annual yields are based on the number of dairy cows which were in milk at any part of the year. Averages are, therefore, lower than for cows which were yielding during the greater part of the year. The figures given should be treated as an index rather than an actual average quantity of milk produced per dairy cow.

SUMMARY OF METEOROLOGICAL CONDITIONS, TASMANIA, 1953.

Rainfall in 1953 was close to average, being slightly below average along the East Coast and on Flinders Island, and above average elsewhere.

Dry conditions in December, 1952, extended into the first quarter of 1953, with above normal temperatures. These conditions were relieved by heavy rain in the south-east at the end of February and beginning of March. The 1952-53 summer was one of the driest summers on record in the north and centre, and led to serious water shortages. A hailstorm in February caused big losses of fruit and vegetables in the south-east, 130,000 bushels of fruit being damaged in the Huon Valley, while gale-force winds in March led to big falls of ripening fruit.

Good relief rains in April replenished water supplies and combined with continuing above average temperatures to produce satisfactory autumn conditions. June and July were unusually cold and, except on the East Coast and on Flinders Island, very wet. August was cold with well distributed rainfall, and was followed by an extremely wet and cold September, especially in the south-east. Below average rainfall and temperatures during October found pastures and cereal crops growing well, although many crops had been sown late owing to wet conditions in early spring. Spring feed was plentiful with stock in good condition. November was cold, and, especially in the eastern half, very wet. Rough, cold weather in November caused losses of newly-shorn sheep, while frequent gales damaged crops. Good rainfall fell in December, but the recurrent short rain periods delayed hay making.

1. MANUFACTURING STATISTICS

(i) SCOPE OF THE STATISTICS.

Scope.—The statistics are compiled annually and show—

Number and size of factories: Number of persons employed, in various categories: Salaries and wages paid: Book value of land, buildings, plant and machinery (not capital invested): cost of material, containers, power, fuel and light (including water and lubricating oil) used in factories: Cost of repairs and replacements to factory buildings and plant: Value of output: Value of production: Quantities and values of fuel used: Quantities and values of principal materials used and articles of output: Value of additions and replacements to, and depreciation allowed on, land, buildings, plant and machinery: Rated horse-power of engines ordinarily in use and those in reserve or idle.

Definition of "Factory".—For the purposes of the accompanying statistics a "factory" is taken to be an industrial establishment in which four or more hands are employed or in which power other than hand is used.

(ii) PERIOD COVERED.

The period covered by the statistics in this Bulletin, is, in the main, the twelve months ended 30th June. In cases where some other accounting period is used it is permissible for factories to complete the census schedule for that accounting period. These cases, however, are comparatively few and their inclusion in no way impairs the comparability of the statistics in the year under review or from year to year.

(iii) DEFINITIONS OF TERMS USED.

Average Number of Persons Employed.— All persons employed in the manufacturing activities of a factory are counted as factory employees. The figures relating to employment, therefore, *exclude* all those engaged in selling and distribution, such as salesmen, travellers, collectors, carters engaged solely on outward delivery of manufactured goods, and retailing storemen. The figures do include, however, proprietors who work in their own businesses, as well as "out-workers".

The average number of persons employed, as outlined above, means in general the average number over the whole year and not the average over the period worked, *i.e.*, where factories work less than a full year, the average number is expressed as the equivalent of employment for the whole year. The classification of factories according to number of hands (Table No. 5) is, however, made in accordance with the numbers employed during the period worked. In all other tables relating to employment, and in the computation of average salaries and wages paid, output per employee, &c., the average number throughout the year is used.

Cost of Materials Used.—This item includes the cost, in the usual sense, of the materials used, treated, operated on, or worked up in producing the articles included in output. In general, it does not include the value of customers' articles or materials repaired, assembled, or treated by the factory.

Other Costs of Manufacture.—Includes the cost of power, fuel, light, water and lubricating oils used, costs of repairs and replacements to factory plant and buildings, and cost of containers and wrappers, but excludes depreciation allowance and other unrecorded overhead charges.

Value of Output.—The amounts given under this heading represent the wholesale selling value at the factory of goods made or processed during the year, including by-products. In addition, it includes the value of other work done, such as repair work, assembling and making up for customers.

Value of Production.—The value of production of any industry was defined by the Conference of Statisticians, 1925, as "the value of consumable commodities produced during the year, deducting, so far as possible, the value of goods consumed in process of production".

In accordance with this definition it was agreed that, in the valuation of factory production, deduction should be made from the value of the output of the cost of raw material, containers, power, fuel, light, lubricants, water, tools replaced, repairs to plant, and for depreciation. All these except depreciation are included in the two items "Cost of materials used" and "Other costs of manufacture" as defined above. On account of the difficulty experienced in securing accurate figures for depreciation, it was subsequently agreed that the particulars obtained should be published, but that no deduction should be made on this account for the present. The value of production as given in the following tables is obtained, therefore, by deducting "Cost of materials used" and "Other costs of manufacture", as defined above, from the "Value of output". This method of valuing factory production has been adopted by the Statistical offices throughout Australia.

During 1952-53 the amounts of depreciation allowed were stated to be £292,277 on land and buildings, or 2·32 per cent of the total book value of land and buildings, and £1,646,378 on plant and machinery, or 7·46 per cent of the total book value of plant and machinery. Details of depreciation appear in Tables Nos. 19 and 25. There are also many miscellaneous expenses, such as maintenance of buildings, &c., depreciation, workers compensation insurance, other insurances, pay-roll tax, income tax, advertising, interest on borrowed money, bad debts and many other sundry charges, which are not taken into account. Consequently it must not be inferred that, when wages and salaries are deducted from value of production, the whole of the surplus is available for interest and profits.

Rated Horse-power of Engines Used.—Statistics of power used in factories other than Central Electric Stations relate to the "rated horse-power" of engines ordinarily in use and of engines in reserve or idle, omitting obsolete engines. In the case of Central Electric Stations, the figures refer to the "rated capacity" of engines and generators installed.

(*a*) Average whole year, including working proprietors. Excluding men engaged in felling, &c., and carting logs to mill.
(*b*) Excluding amounts drawn by working proprietors and amounts paid to workers engaged in felling, &c., and carting logs to mill.
(*c*) Represents principally value of logs sawn, peeled or sliced, but also includes value of minor items such as nails, tie-wire, &c., used.
(*d*) Includes cost of water and lubricating oils used, cost of repairs and replacements, containers and wrappers, but excludes various overhead charges.
(*e*) Value of sawn, peeled and sliced timber produced (shown in last column) plus added value due to re-sawing and dressing operations and making up into fruit cases plywood, &c., where this is actually performed in the mills.
(*f*) Value of output less costs of manufacture other than labour.
(*g*) Suburbs comprise Glenorchy municipality and metropolitan portions of Clarence and Kingborough municipalities.
(*h*) Suburbs comprise metropolitan portions of Beaconsfield, Evandale, Lilydale, St. Leonards and Westbury municipalities.
(*i*) Excluding metropolitan portions of these municipalities.

2. BUILDING STATISTICS

(i) BUILDING PERMITS.

(*a*) Private building permits relate to permits issued by local government authorities; government building figures relate to contracts let and day-labour projects commenced by governmental authorities.

(*b*) *Values.*—All values shown exclude the value of the land and represent the estimated value of buildings on completion.

(ii) NEW BUILDING CONSTRUCTION.

(*a*) Definitions of Terms Used—

Owner-Builder.—For the purpose of this bulletin, an owner-builder is a person who is actually building his own house or is having his house built under his own direction without the services of a contractor.

Commenced.—A building is regarded as having been commenced when work on foundations has begun. Owing to the difficulty of defining the exact point that this represents in building operations, it is probable that interpretations placed upon it by informants are not entirely uniform.

Completed.—A building is regarded as having been completed when the builder has fulfilled the terms of the contract. As with commencements, the interpretations placed upon this definition may vary.

Under Construction.—A building remaining uncompleted at the end of a period is regarded as being under construction regardless of whether construction was actively proceeding on that particular date.

Employment.—The figures of employment relate to persons actually working on new buildings on a specified day. They include working principals, employees, men working, as, or for, sub-contractors and men temporarily laid off on account of weather. In addition, they include some employees engaged on alterations, additions, renovations, or repairs to buildings when these jobs are undertaken by a contractor who builds new buildings. The figures include estimates for persons working on owner-built houses.

Values.—All values shown exclude the value of land and represent the estimated value of buildings on completion.

(*b*) *Explanatory Notes.*—

Details in this bulletin relate to the building operations of private contractors, government authorities and owner-builders.

Figures relate only to the operations of persons who build new buildings.

Alterations, additions, renovations and repairs to buildings are excluded, because of the difficulty in obtaining complete lists of persons who engage in these operations.

Figures for houses exclude converted military huts, flats, and shop dwellings. Some houses built on farms are excluded but these do not affect the figures materially.

ACCUMULATED DEFICIENCY TO 30TH JUNE, 1953.

The figures in the above table do not provide a complete record of the Accumulated Deficiency in the State's finances, owing to the practice existing prior to the year 1933-34 of debiting Suspense Accounts with Revenue Charges. The following additional amounts should be added to the deficiency prior to 1934-35, as shown above, to arrive at the aggregate position:—

Accumulated Deficiency at 30th June, 1953:—

Deficit as shown in above table	2,758,254
Losses on Returned Soldier Settlement	1,127,857
Loss on realisation of State Ships	61,260
Losses on Marrawah Tram	83,134
Hydro-Electric Depreciation Deficiency	47,211
Other	102,565
Total	£4,180,281

NOTE.—The above sum excludes suspended sinking funds and the non-provision of depreciation for replacement of certain capital assets of the State.

In the table above the separate Commonwealth and State totals are not adjusted, but the combined totals are shown adjusted and also unadjusted.

The duplications excluded from the adjusted figures include the following items:—Tax reimbursements, Special Financial Assistance, payment of interest under the Financial Agreement, Special Grants, Price Control reimbursement, Coal Strike Emergency Grant, and State payments of Pay-roll Tax to the Commonwealth. There are other duplications not allowed for—e.g., various payments from the Commonwealth to the States for the services rendered and miscellaneous Commonwealth receipts from the States, and the adjusted figures are, therefore, still slightly overstated.

(*a*) Note—There was no debt outside Australia at 30th June 1953.

(*b*) Much of the debt of Local Government Bodies is in the form of Instalment Debentures, which means a fixed periodic payment on account of interest and principal. For each debt, therefore, the payment on account of interest decreases and the payment on account of principal increases from year to year. These figures indicate the liability as at 30.6.1953.

(*c*) Mainly periodic payments in reduction of principal; repayment of loans from Sinking Funds are excluded.

FRIENDLY SOCIETIES.

REPORT OF THE STATISTICIAN FOR THE YEAR, 1952.

Hobart, 20th August, 1953.

SIR,

In accordance with Section 10 of the Friendly Societies Act, 1888, I have the honour to make the following report with respect to the year 1952.

(NOTE.—Figures in parentheses refer to the previous year—1951).

Returns and Information.

Copies of the printed report and tables for 1951, showing the movement in membership, finance, &c., of the societies, were distributed to all lodges and other interested parties.

The returns relating to the year 1952 were furnished in accordance with the provisions of the Friendly Societies Act.

Societies.

At the end of 1952, the number of Friendly Societies registered in Tasmania totalled 20 (exclusive of two dispensaries) divided into 13 general societies and seven special societies. Special societies are those established by firms, organizations, &c., which have been registered under the Friendly Societies Act, with objects comparable with those of general societies but without branches. The 13 general societies had branches totalling 154, of which 131 were for males, 20 for females and 3 for juveniles.

Membership.

The total membership at 31st December, 1952, was 18,800, comprising 18,144 in adult male lodges, 599 in adult female lodges and 57 juveniles. Compared with the numbers recorded on the same date in 1951, this represents a decline of 538 members or the equivalent of 2·8 per cent and is a continuation of the downward movement which has been apparent for some years: this is reflected in the following table:—

Membership of Friendly Societies, Tasmania.

31st December	GENERAL SOCIETIES				Special Societies (*a*)	Grand Total	Numerical Decrease on Previous Year	Percentage Decrease on Previous Year

1952	13,051	599	57	13,707	5,093	18,800	538	2·8

(*a*) Both sexes.

Details of the movement in membership arising from admissions and departures are given in the table below for each year since 1947. The increase in admissions by initiation is shown in detail in the tables on page 10.

Distribution of Members According to Age.

It is important to note the continued increase in the average age of members. The continuing decline in membership, particularly in the age groups 16-19 years and 20-29 years, has resulted in a drift into the older age groups as indicated in the following table. The membership included in this table is restricted to male members of general societies which form the most important section of total membership.
